# ACROSS

Towards user journeys
for the delivery of cross-border services
ensuring data sovereignty

ACROSS aims to provide an integrated ecosystem to create **user-centric**, accessible, interoperable and regulation-compliant **cross-border digital services,** while assuring data sovereignty and control to the citizens.

## OUR OBJECTIVES

Provide a n**ew governance model** for the delivery of digital and mobile cross-border public services.

To analyse the transformative impacts of interoperable, single-sign-on, **crossborder and user-centric digital** public services.

A **data governance framework** where data subjects can control the use of their personal data empowering them.

Measurable **outcomes in three real use cases** & a viable business model to ensure the sustainability of the project.
